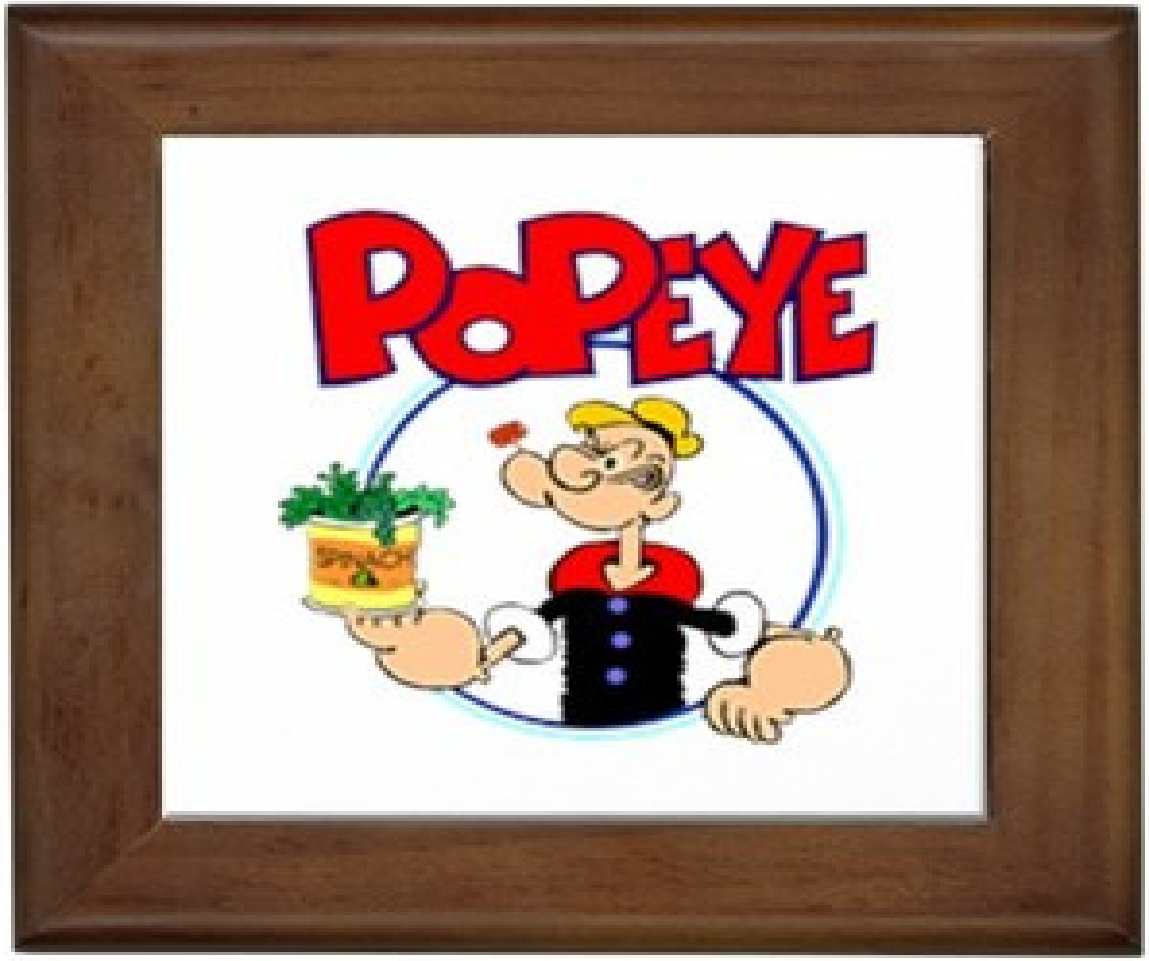
The Spinach Myth



IQSC Data Integrity Goals

- Reduce Costly Data Errors
- Save Time and Precious Resources
- Provide a data analysis tool that assist hospitals in performing audits that identifies format and data error
- Provide reports that are easy to use in identifying data issues
- Provide Physician reports for validation as required by Texas legislation
- Provide a data quality measurement
- Have good patient demographic information for matching
- Ability to map in multiple formats and map out the required state reporting format (flat file format if becomes needed)
- Allow for simple data submission
- Give personal customer support in meeting data requirements

Obstacles

- Lack of user commitment to ensuring data errors are addressed
- Needed more simple tool that was not as complicated as current tool
- Needed to be FISMA Compliant (Federal Information Security Management Act)
- Needed a quick turnaround for implementation
