IQSC Data User's Educational Event

HEALTHCARE DATA:
Descriptive, Predictive, Prescriptive

Registration Deadline: November 2, 2017

We hope you can join us for the First Annual Information Quality Services Center (IQSC) Data User's Educational Event on November 16, 2017 at Texas Woman's University in Dallas. Titled "Healthcare Data: Descriptive, Predictive, Prescriptive," the event will highlight nationally known speakers from across the U.S. discussing the importance of Big Data in today's healthcare industry.

SPEAKERS TO INCLUDE

Katherine Rowell

"You have the data but can you see the story?"

Kathy Rowell is co-founder and principal of Katherine S. Rowell & Associates and HealthDataViz, a Boston firm specializing in helping healthcare organizations design and present visual displays of data to inform decisions and stimulate action. She advises providers and regulatory agencies how to align systems and develop staff to communicate healthcare data clearly. She made crucial contributions to the establishment of the National Surgical Quality Improvement Program (400+ participating hospitals).

Joshua Milligan (Tableau Zen Master)

"Descriptive to Predictive: The evolution of healthcare analytics & how modern tools empower you to make a difference"

Joshua Milligan has been with Teknion Data Solutions since 2004 and serves as principal consultant. With a background in software development and custom .NET solutions, he brings a blend of analytical and creative thinking to BI solutions and data visualization. Joshua has been named as a Tableau Zen Master every year since 2014. This places him in a unique group recognized as masters of the tool with a deep desire to teach others.

Will Grey

Will Grey is a B.I. thought leader who has helped more than 50 organizations, large and small, successfully implement modern solutions that include Analytics CoEs, Digital Transformations, Visual Analytics, Data Science, and cloud technologies. As a Practice Leader/Principle Consultant at Teknion, he serves a team of high-performing consultants that implement leading edge solutions across many technologies and industry verticals such as healthcare, financial services, and consumer packaged goods.
