Images from 2016 - 2019

Objectives

- Describe an ecosystem
- Associate the SDoH to the ecosystem
- Illustrate the step-by-step approach to analyze SDoH outcomes
- Questions

1. DESCRIBE AN ECOSYSTEM

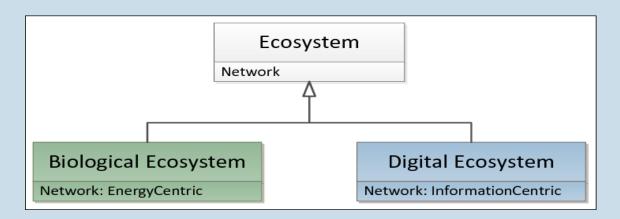

Ecosystem Definition

/ˈēkōˌsistəm/

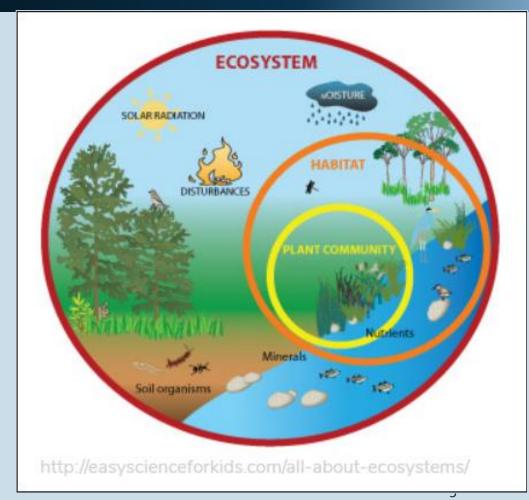

noun ECOLOGY

- a biological community of interacting organisms and their physical environment. "the marine ecosystem of the northern Gulf had suffered irreparable damage"
- (in general use) a complex network or interconnected system. "Silicon Valley's entrepreneurial ecosystem"

Definitions from Oxford Languages

Briscoe's hypothetical abstract Ecosystem definition [34] Graca, P., & Camarinha-Matos, L. M. (2017). Performance indicators for collaborative business ecosystems – literature review and trends. *Technological Forecasting & Social Change*, *116*, 237-255. <u>https://doi.org/</u>10.1016/j.techfore.2016.10.012.

The 21st Century Cures Act [Dec. 13, 2016]

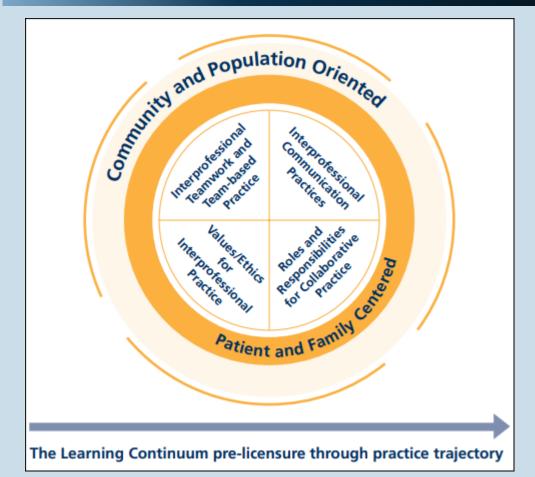

The 21st Century Cures Act [Dec. 13, 2016] (cont.)

- Promotes and funds the acceleration of research into preventing and curing serious illnesses; accelerates drug and medical device development; attempts to address the opioid abuse crisis; and tries to improve mental health service delivery.
- The Act includes provisions that push for greater interoperability, adoption of electronic health records (EHRs) and support for human services programs.

- The 21st Century Cures Act allows patients to access their medical data upon request and, as of 2022, will allow third parties to access that data through APIs.
- Like open banking legislation has done in Europe, the law is expected to give rise to a healthcare app ecosystem that could disrupt the incumbent providers.

Glover, C. (2021, April 5). The cures act lays the foundations for 'open healthcare' in the US. *Techmonitor*, 2021, 1-1. <u>https://techmonitor.ai/leadership/digital-transformation/21st-century-cures-act#:~:text=The%2021st%20Century%20Cures%20Act,could%20disrupt%20the%20incumbent%20providers.</u>

Interprofessional Collaboration

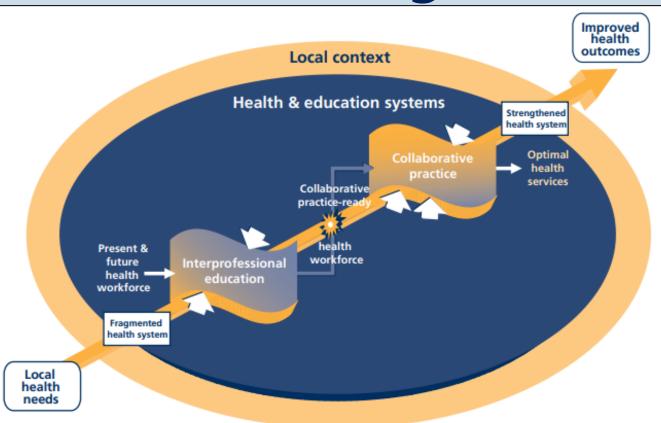

The <u>World Health Organization</u> defines interprofessional collaboration in healthcare as:

"multiple health workers from different professional backgrounds work[ing] together with patients, families, carers (caregivers), and **communities** to deliver the highest quality of care."

Benefits of Interprofessional Collaboration

1 + 1 = 3

- 1. Improve patient care outcomes
- 2. Reduce medical errors
- 3. Start treatment faster
- 4. Reduce inefficiencies and healthcare costs
- 5. Improve staff relationships and job satisfaction

World Health Organization (WHO). (2010). Framework for action on interprofessional education & collaborative practice. Geneva: World Health Organization. Retrieved April 11, 2011 from http://whqlibdoc.who.int/ hq/2010/WHO_HRH_HPN_10.3_eng.pdf

AN ALL OF US RESEARCH PROGRAM COLLABORATION

LET'S GET MOVING THROUGH THE PANDEMIC COMMUNITY OUTREACH EVENT

SATURDAY, JUNE 5, 2021 | 10 A.M. TO 2 P.M.

TEMPLE MISSIONARY BAPTIST CHURCH | 638 POWER DR., DUNCANVILLE, 75116

TALK TO A PHARMACIST

- · Schedule an onsite appointment with pharmacist Alice Grant
- Enroll in the medication review program

COVID-19 VACCINATION SIGN UP

- Get info on the All of Us Research Program & COVID-19
- Register for the COVID-19 vaccination

BREAK-OUT SESSIONS

- Diabetes
- · Pain Management
- PEARLs Program for depression

BENEFITS COUNSELING

- · Application for Medicare Savings Program
- · Counseling on Medicaid and Medicare
- Assistance with a Medical Director (power of attorney)

FREE FOOD BOXES

first 200 households

FREE HAIRCUTS

by barber Rashad Smith o 5th House Hair Cuts first come, first served

KID ZONE bounce house, face painting & more activities

ENTERTAINMENT DJ (Unskript3d) Leo Alvarez

> WORKOUTS ABC Health and Fitness

COMMUNITY INVOLVEMENT BY HEALTH CARE PROFESSIONALS, STAFF, AND STUDENTS

2. ASSOCIATE THE SDOH TO THE ECOSYSTEM

Definitions

- **Disparity** quantity that separates a group from a reference point on a particular measure of health that is expressed in terms of a rate, proportion, mean, or some other quantitative measure. (HP2010)
- **Inequity** is the fair distribution of health determinants, outcomes, and resources within and between segments of the population, regardless of social standing.
- **Inequality** A measure of the degree of association between differences in rates between groups and the distribution of the population among groups
- Burden The difference in the number of persons affected between groups.

Richard Klein MPH, David Huang, Ph.D. National Center for Health Statistics Centers for Disease Control and Prevention located at: <u>https://www.cdc.gov/nchs/ppt/nchs2010/41_klein.pdf</u>

Neighborhood and Built Environment

Goal: Create neighborhoods and environments that promote health and safety.

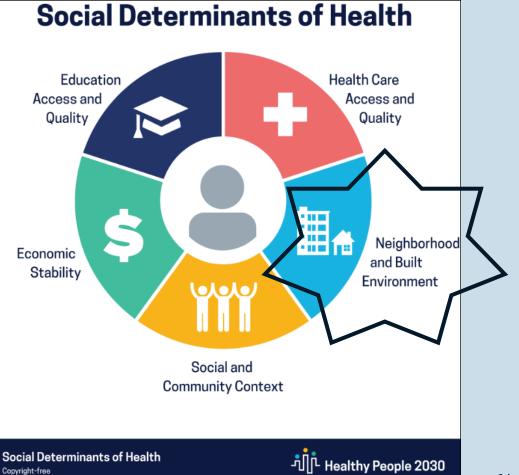

Objective Status

Ø	3 Target met or exceeded
(+)	0 Improving
0	3 Little or no detectable change
Θ	O Getting worse
	16 Baseline only
0	6 Developmental
	1 Research

Social Determinants of (SDoH) & Examples

- General [violent crimes] [broadband Internet]
- Environmental Health [toxic pollutants]
- Health Policy [water systems]
- Housing and Homes [blood lead levels]
- Injury Prevention [motor vehicle crash deaths]
- People with Disabilities [non-steps house entrance]
- Physical Activity [walking or biking]
- Respiratory Disease [people with asthma]
- Sensory Disorders [hearing loss due to noise]
- Tobacco Use [prohibit smoking in businesses]
- Transportation [mass transit]

Social Determinants of Health and Care Delivery

Increasing skills to support SDoH awareness

- Incorporate SDOH curriculum into all clinical courses, ensuring students routinely assess for SDOH in clinical rotations.
- Strengthen interdisciplinary collaboration with social work, public health, city planning, occupational health, police, and fire fighters to ensure care is delivered effectively at the community level. [Community-based Ecosystem needed]
- Include SDOH in administrative policies.
- Stay current on proposed legislation and their potential effects on SDOH.
- Advocate for the use of documentation tools that utilize SDOH measures.
- Integrate SDOH into the standard assessment and electronic health records.

All of Us Research Work Bench

- Academic involvement via curriculum and assignment activities
- Academic involvement via recruitment efforts

More than 382,000 participants who have completed the consent process.

382,000 +

More than 279,000 participants fully enrolled.*

279,000+

More than 500 research projects are using *All of Us* data.

500+

Researcher Workbench Reaches 1-Year Anniversary

*Fully enrolled participants are those who have shared their health information with All of Us, including giving blood and urine or saliva samples.

The Gravity Project

- Initiated in November 2018 by by Social Interventions Research & Evaluation Network (SIREN) with funding by Robert Wood Johnson Foundation
- Convene broad stakeholder groups in identifying social risk data for interoperable electronic information exchange
- Call to action around creating national standards for representing SDoH data in EHRs
- Seeks to identify coded data elements and associated value sets to represent social determinants of health data documented in EHRs
 - Focused on food insecurity
 - Housing instability/quality
 - Transportation access.
- These domains were selected based both on existing research linking these factors with health and utilization

3. ILLUSTRATE THE STEP-BY-STEP APPROACH TO ANALYZE SDOH OUTCOMES

Prerequisite: Reliable Data

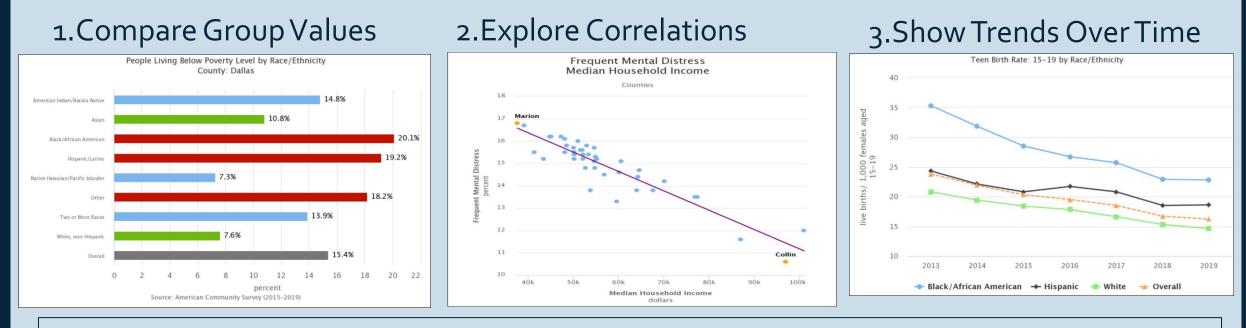

Data quality matters

- Government Agencies
- National Research Organizations
- Private Market Research Organizations
- Universities

Data resources/databases

- Centers for Disease Control and Prevention
- U.S. Census Bureau
- Dept. of Health and Human Services
- Local and state agencies [Texas Health Care Information Collection (THCIC)

Ecosystems to Manage Complex Patient Care Needs

THCIC Outpatient Episodes Analysis

- In accordance with Health and Safety Code, Section 108.012(b), "the council (department) may charge a person requesting public use or provider quality data a fee for the data. The fees may reflect the quantity of information provided and the expense incurred by the council in collecting and providing the data and shall be set at a level that will raise revenue sufficient for the operation of the council (department's program). The council (department) may not charge a fee for providing public use data to another Texas state agency. Chapter 108 may be viewed by clicking here.
- The Texas Outpatient Public Use Data File (PUDF) contains data on outpatient surgical and radiological procedures from Texas hospitals and ambulatory surgery centers. The PUDF has been released through fourth quarter 2020. The first quarter 2021 is tentatively scheduled to be released December 2021.

Q Search for Indicators

Calculated from 6 indicators:

- 1. Poverty
- 2. Income
- 3. Unemployment
- 4. Occupation
- 5. Education
- 6. Language

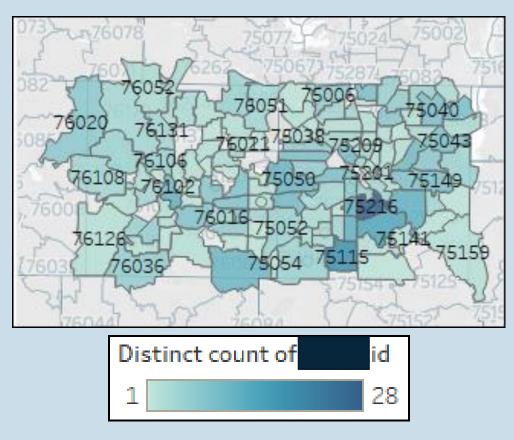

The indicators are weighted to maximize the correlation of the index with [health indicators]:

- 1. premature death rates
- 2. preventable hospitalization rates

TEACHING & LEARNING

Nurses/HCP Roles in Health Care Equity

Examples of nursing/Health Care Professional's (HCP) roles in acute, community, and public health settings include:

- 1. Care Coordinator
- 2. Policy Maker
- 3. Clinician
- 4. Advocate
- 5. Educator
- 6. Researcher/Scientist
- 7. Administrator
- 8. Informaticist

Objectives Reviewed

- Describe an ecosystem
- Associate the SDoH to the ecosystem
- Illustrate the step-by-step approach to analyze SDoH outcomes
- Questions
